

Anton Antonov

Head of AI and Quantitative Research

Anton Antonov is a technical leader specializing in quantitative finance and artificial intelligence with 14 years of experience in statistical modeling, machine learning, and AI implementation. As Head of AI & Quant at dxFeed Solutions, he leads the company's AI/ML strategy while managing a data science team, combining deep quantitative expertise with hands-on technical leadership.

Under his leadership, dxFeed has launched award-winning AI applications including SummerFox, an LLM-powered portfolio summarization service, and Grenadier, an autoencoder-based anomaly detection system for market data. He previously led the Index & Quant division, growing the business to support 150+ real-time indices while managing relationships with SEC-regulated exchanges such as MIAX and The Small Exchange.

Anton holds a PhD in Statistical Modeling & Monte Carlo Methods and earned his Certificate in Quantitative Finance with Distinction from the CQF Institute.
